Professional Summary

Software Engineer inspired by design and functionality, with experience in full-stack development and UI/UX design. Skilled in building responsive, visually engaging interfaces and scalable backend services. Strong background in JavaScript, React, and C#, with experience working with frameworks like Node.js, .NET, and Azure, as well as Figma prototyping, wireframing, and collaborative development. Experienced in both UI development and back-end engineering, contributing to enterprise web applications by implementing new features, optimizing system performance, and collaborating within Agile/Scrum teams to deliver high-quality solutions.
